

ViewSonic Series

Ultrasonic Level Sensor

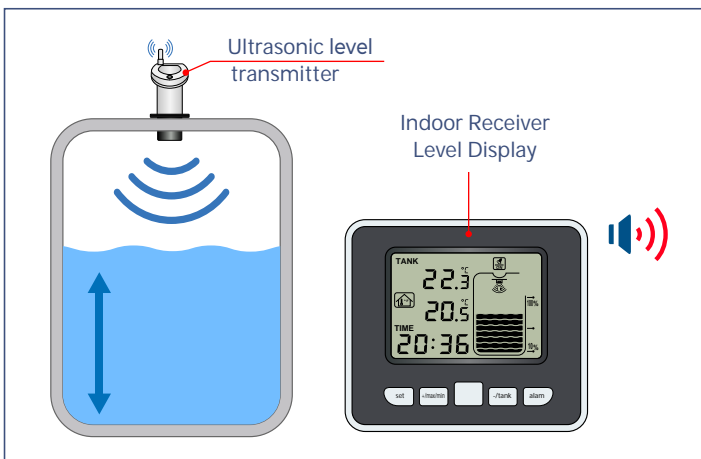

- ✔ Wireless Ultrasonic Level Sensor
- ✔ Battery Operated
- ✔ High and Low Value Alarm

Product Description

Monitor your outdoor tank effortlessly from the comfort of your living room, even if you're up to 100 meters away. The receiver unit offers versatile placement options – you can mount it on a wall or simply extend the stand and position it on your kitchen table or desk.

With this device, you'll have access to essential information such as room temperature, tank temperature, and water level, which is conveniently represented by a 10-element bar graph. You can also keep track of minimum and maximum records and configure alarms for specific water levels, including high, low, or when the tank is empty.

Features

- ✔ Battery Operated
- ✔ Approx 5 Years Life Expectancy
- ✔ Digital LCD Display
- ✔ All Plastic Design
- ✔ NEMA 4X Plastic PP Enclosure
- ✔ Non-Contact Technology
- ✔ Double Walled Tanks
- ✔ Wireless Communication to Remote Display Over 200ft
- ✔ Remote Applications / No Wiring Required
- ✔ Low / High Level Display Indication

Technical Specifications

Indoor Temperature Range	0~60°C
Liquid Temperature Range	-40~60°C
Display Screen	Digital LCD Display
Liquid Depth Range	0 - 15m
Display Accuracy	0.01m
Measurement Accuracy	±0.03M
Transmission Frequency	433MHZ
Launch Range	100m (open area)
Transmitter Frequency	Send once every 30 seconds when the liquid level changes, and once every 3 minutes when the liquid level does not change
Alarm Duration	120sec
Power Supply	Receiver: 2xAA batteries; Transmitter: 6XAAA batteries;
Enclosure	NEMA 4X PP
